

Priyadarshini College of Engineering

Department of Computer Technology

Report on Industrial Visit at DigiSol on 10th March 2016 at Verna.

Agenda:

DigiSol is a leading manufacturer in routers and various products. Students learn about wireless routers ,Smartlink working,Mother Board and various hardware components.

About:

DigiSol Technologies provides IT consulting and outsourcing services to clients globally as partners to conceptualize and realize technology driven business transformation initiatives. We use a low-risk Global Delivery Model (GDM) to provide IT solutions adhering to world-class quality standards. We have marketing and development offices in US, UK, and India to offer cost effective IT solutions using an optimal mix of onsite, offsite and offshore services.

The ever-changing advances in technology require organizations to partner with technology companies, which can understand their business needs. We provide the domain knowledge and technical competence to determine how technology impacts your business, and how you should harness its power to serve your customers better at reduced cost and increasing profitability.
