**Annual report  
2025-26**

# About chapter

The **PCE ACM Student Chapter at Priyadarshini College of Engineering, Nagpur**, is a vibrant and student-driven Community dedicated to fostering innovation, collaboration, and excellence in the field of computing and technology. Affiliated with the Association for Computing Machinery (ACM), the chapter serves as a hub for students passionate about exploring emerging technologies and enhancing their technical and professional skills.

The chapter organizes a wide range of activities, including workshops, hackathons, coding competitions, seminars, webinars, and masterclasses, designed to help students apply theoretical concepts to practical challenges. These events provide hands-on learning experiences and encourage members to solve real-world problems using technology. The chapter also focuses on conducting bootcamps and training sessions on industry-relevant topics, preparing students to stay ahead in a rapidly evolving tech landscape.

A strong emphasis is placed on open-source contributions, enabling members to participate in collaborative projects that drive innovation and teamwork while contributing to the broader tech community. The chapter also connects its members with mentors, industry leaders, and academic experts, creating opportunities for networking, guidance, and exposure to cutting-edge advancements in technology.

In addition to technical growth, the PCE ACM Student Chapter nurtures leadership skills among its members by encouraging them to take on organizational roles and responsibilities in planning and executing chapter initiatives. This not only enhances their interpersonal and management abilities but also fosters a sense of ownership and community spirit.

The chapter's mission is to empower students, bridge the gap between academia and industry, and create a culture of continuous learning and innovation. By offering a platform for professional development and collaboration, the PCE ACM Student Chapter aims to shape its members into skilled technologists and innovators ready to thrive in a competitive global environment.

## PCE ACM STUDENT CHAPTER

### Roles And Responsibilities

ACM chapters are responsible for maintaining the frequency and quality of activity in the area they serve, and for identifying and promoting those activities of specific interest to their members.

Chapters have an executive council, which includes elected chapter officers, the past Chairperson and, in many cases, the chairpersons of the standing committees.

ACM chapters communicate with the Association; submit annual financial and activity reports; report changes in officers and contact information; update chapter member lists; and adhere to ACM policies concerning chapter membership
